> About us

CRS is a family run business established in 1975. Based in Ipswich we cover a radius of 30 miles from Ipswich taking in Suffolk, North Essex & South Norfolk. We stock a wide range of cash registers, touchscreens & linked epos systems. We also supply electronic scales both retail and light industrial, price marking guns & labels and food equipment including vacuum packers & meat slicers.

From our large showroom we can offer an extensive range of equipment both new & fully reconditioned, thus ensuring you get the right machine for the job. We supply equipment on an outright purchase basis, we also rent equipment at very competitive rates and we can also provide equipment for short term hire. All equipment we supply is serviced and maintained by our own engineers and we also provide a programming service.

Further details on any of our products or services can be found on our website. If you wish to visit our showroom it is situated on the eastern side of Ipswich at 94 Rushmere Road, Ipswich, IP4 4JY.

➤ Hospitality Systems

We supply systems for pubs, clubs, cafes, restaurants & hotels from simple flat keyboard bar cash registers to networked touchscreen systems with wireless hand-held waiter pads.

Sharp XE-A150

- > Flat keyboard with up to 70 items.
- > Multi user with six clerk buttons.
- > Multi line LCD operator display and rear customer pole display.
- > Fast and quiet thermal receipt printer.
- > Graphic/programmable logo message.

Restaurant billing systems

The in-built multi-line screen displays orders as they are entered, prompting the server where necessary, for example to enter condiments or cooking instructions.

The clever menu system can be used for 'Table d'Hote' style fixed price menus. The menu screens automatically take the operator to the right position according to the progress of the transaction.

A single terminal can drive up to 8 remote kitchen/bar printers. Alternatively the terminal can produce its own kitchen/bar tickets using the integral receipt printer. Detailed and categorised bills can be printed on request.

Uniwell Touchscreens

The Uniwell touchscreens are a range of cost effective terminals based on proven & powerful firmware. The flexibility of the software enables the touchscreens to be configured to meet the operational requirements of any hospitality operator.

The touchscreens take advantage of the latest colour screen technology to provide operators with a bright display that has an excellent viewing angle. With a small footprint the touchscreens can be front or back bar mounted.

Designed for ease of use the system significantly reduces training times. Operators are led through transactions, prompting them to select options such as cooking instructions or side orders. The system promotes good customer service and it also significantly reduces transaction times.

Hand-held order pads

Hand-held waiter pads allow orders to be taken at the customer's table using the menu-driven touch screen, and sent directly to the kitchen or bar, enabling your key staff to remain front of house taking care of your customers.

Servers can walk among your customers and take those extra orders that you might otherwise not receive while at the same time providing a higher level of service.

The order pads enable fewer staff to achieve more with less effort.

➤ Bar Code Scanning

We supply bar code scanning systems for retail businesses, from innovative low cost scanning cash registers, cash registers with in-built re-ordering and shelf-edge labelling that do not need a PC, through to fully integrated epos touchscreen terminals which can be linked to back office software.

Sharp XE-A580

- > Low cost but feature rich
- > LCD multi line screen
- > Receipt and audit thermal printers
- > Memory for up to 10,000 items
- > Integral SD card reader

A choice of bar code scanners is available from hand-held laser scanners to the multi line presentation scanners.

Combine stunning good looks with powerful performance, bringing prestige and style to any location

Touchscreens are ideal for retail businesses providing either a complete and self contained epos system with the back office built in to the terminal for small businesses and start-ups or as part of a networked system with dedicated back office software installed on a PC in the office for larger organisations.

Retail touchscreen systems have evolved over the years to cope with the changing needs of modern business. These days, you can buy a T-shirt or a cookery book in a restaurant. You can buy lunch in a garden centre. Delicatessens sell food over the counter and often operate a restaurant on the same premises. You can have a two for one offer in a supermarket or two lunches for the price of one in a restaurant.

The same touchscreen software takes care of it all, whether your business is general retailing or hospitality. The functionality is the same – the application is adaptable to your business requirements.

With all our touchscreen systems various peripherals can be linked to provide a fully integrated system including bar code scanners & checkout scales.

> Epos Software

We can supply a range of back office software, for simply collecting reports from cash registers to loyalty and cashless systems.

Lynx back office

Lynx is a comprehensive back office software package designed to manage the data provided by retail and hospitality Uniwell/Sharp epos terminals. The stock module gives you full control of your stock and is suitable for both retail and hospitality applications.

CRStouch

The CRStouch software is pos software for retail applications. In addition to operating at the point of sale CRStouch provides real-time stock and full back office functionality with management reporting.

Velocity Software

We have partnered with Conexio software who can supply their Velocity Business Management Software which links to Avery scales.

Velocity allows you to effectively manage your retail and wholesale customers via a simple user interface designed with you in mind.

> Cash Registers

We stock a range of new & reconditioned cash registers. From simple single roll machines to multi department receipt & audit models.

XE-A100

- > Thermal receipt with electronic audit
- > 16 departments

Big print price gun
Six band BIG print price gun taking 26 x 16 rectangular labels.

Outdoor labelling

We stock labels and ink rollers to fit a number of pricing guns suitable for use in garden centres and other outdoor locations. UV ink rollers are used which have been specially developed to resist fading when exposed to sun light. Outdoor labels are made of a weather resistant plastic material and are available plain or overprinted.

OVERPRINTED LABELS

Don't have to cost you an arm & a leg

90,000 overprinted labels (26 x 12w)
White or yellow labels

plus a **FREE** price marking gun
(First order only)

With this offer you can also trade in old price marking guns for brand new Motex guns for just £19.00 each.
(Normal price £29.00).

➤ Swipe Cards

We can print swipe cards suitable for membership, cashless, I.D., security & loyalty applications.

All cards are printed on solid plastic cards (760 microns) which is the same thickness as a standard credit card. The cards can be printed in up to four ink colours or in Full Colour depending on your requirements. The base cards can be coloured or metallic and both sides of the card can be printed.

Options available are:

- Signature strip • Magnetic strip • Personalisation • Barcodes
- Sequential Numbering • Photos

➤ Price Tags

Printed plastic cards offer a great alternative to hand written laminated or cardboard signs. Not only by offering improved hygiene, but also by saving money, time and providing the opportunity to offer allergy / food content advice to customers in a clear and concise way.

Evolis cards and ribbons are approved for direct food contact and cost as little as 15p each to print.

➤ Time Clock

Calculating time clock

Makes light work of your payroll

This time clock has been developed to not only show daily 'IN' & 'OUT' but will also automatically calculate the time worked and the total time worked

- > Automatically feeds and ejects the clock card ~ does not require the employee to press any buttons.
- > Large back lit LCD display
- > Calculates the time worked and a running total of the accumulated time.
- > Suitable for up to 50 employees per machine.
- > Recognises the front and back of the card.
- > Cards supplied in packs of 100.

> Supplies

We offer top quality rolls at very competitive prices, with up to 40% discount for quantity orders, with payment on delivery and free delivery. We stock single, two & three ply, action & thermal rolls to fit cash registers, scales, calculators, epos systems & PDQ machines.

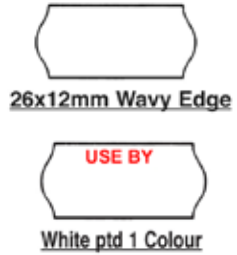

Ribbons & Ink rollers

Ribbons & ink rollers to fit cash registers, calculators & epos systems.

Labels

We stock labels for all makes of price marking guns and can supply overprinted labels to customers requirements. We also supply labels for bar code printers & thermal printers.

Scale labels

We also stock pre-printed and plain labels for most makes of label printing scales. We can also supply overprinted labels to customers requirements.

> Service

All the equipment included in this catalogue and supplied by us is fully maintained and serviced by our own team of engineers.

We also look at other makes and models of cash registers, epos systems, scales and food equipment.

A re-programming service is also available for customers with existing equipment that needs updating.
In addition we can provide maintenance contracts when equipment is out of guarantee.

> Equipment Hire

Do you need a cash register for a function, exhibition or outside bar? Perhaps you are looking for a counting scale for a stock-take, a vacuum packer for a packing job or even cash counting equipment for a carnival?

We can provide equipment for any period of time short or long at very reasonable rates. All equipment is ex-stock and where necessary can be programmed or tailored to your requirements.

Available to hire for a weekend, a week or a month are the following products;

- Simple single roll cash registers to epos terminals
- Basic retail scales to label printing scales
- Vacuum packers or coin sorters
